Episode #2615

Vortex Gorilla VacTM Dust Containment System

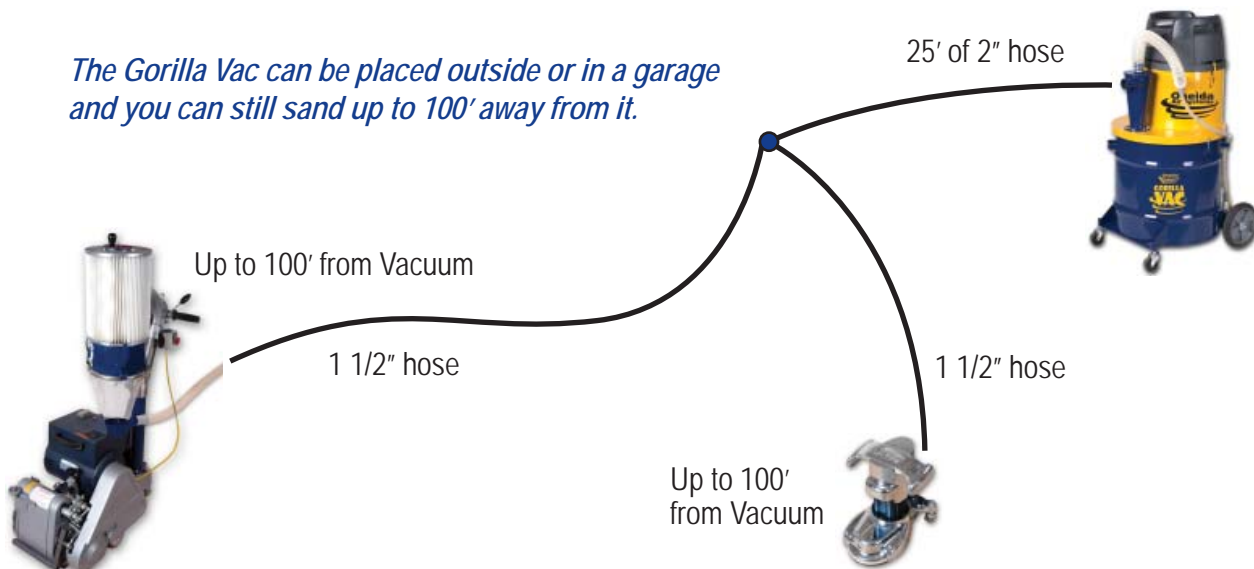

"I'm so happy with the system that even if it worked half as good as it does, I'd still buy it!"

"Oneida changed my business and the way I sand floors. Their dust containment system truly works. I can't find dust anywhere. My clients love it, they can't believe it. My crew loves it, no more plastic, no more dust masks and the jobs come out better than ever. I did a lot of research on all the dustless systems and none compared to the efficiency and ease of Oneida. From setup to operation to portability, I was amazed at how simple it was.

Eric Nylin - Nylin Floors, Boston, MA
Owner Since 2004

How the Oneida Vortex DCS™ can help your business.

- New patented onboard vortex technology allows big drum and belt sanders to run clean even with 100 ft. of small diameter hose on 110V. ***No other system can do that.***
- Make more money. You can charge more for dustless sanding and customers are willing to pay it. You save valuable cleanup time and there's no need to hang plastic. ***No other portable system is as clean as ours.***
- Increased customer satisfaction with better finish results. ***Referrals are the best advertising.***
- A clean jobsite is a healthier environment for customers and workers. ***Wood dust is a known carcinogen.***

Why the Oneida Vortex DCS™ is the best portable on the market today!

- New patented onboard vortex technology allows big drum and belt sanders to run clean even with 100 ft. of small diameter hose.
- Run 2 machines at once effectively.
- Runs on 110V.
- Sander vortex is repositionable for clear line of sight.
- No weighted bags on sander to contend with.
- High efficiency vortex keeps filters clean.
- Portable and easy to handle.
- HEPA filtration.
- 35 gal. drum with plastic bag for easy disposal.
- Easy maintenance.
- No need for another shop vacuum.
- No dust blow-out under sander.

Oneida's patented vortex technology removes the dirt mechanically so the filters don't clog.

- ▶ 3 Stage Filtration
- ▶ HEPA Filtration - 99.97% @ 0.3 Microns
- ▶ Powerful Dual Motor Vacuum
- ▶ 110V / 1800 Watts
- ▶ 35 or 55 Gal. Capacity
- ▶ Easy Dust Removal in Plastic Bags
- ▶ Inlet Diameter - 2"
- ▶ 78 dBA
